

# Precision Medicine:

## Thoughts to trigger our imaginations

Amy Taylor  
Community Health Center, Inc.

## Question #1

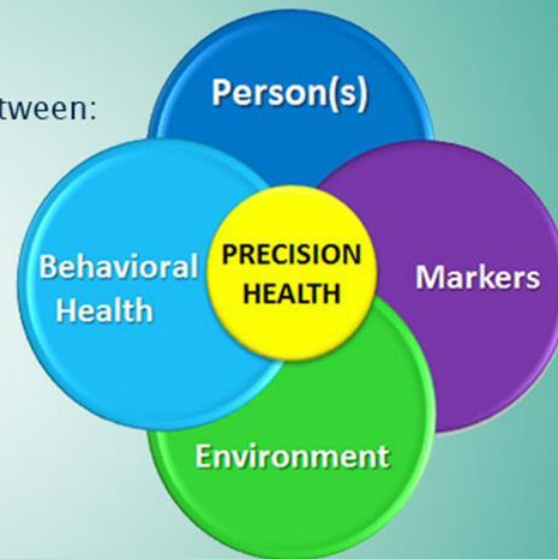

1. What does precision medicine mean to you?
2. A. Medicine that is dosed precisely
3. B. an opportunity for those who have private insurance to access the latest in medical advances
4. C. an opportunity for community health centers to advocate for their patients and continue the fight for equal access to care for all people

**Precision medicine** (PM) is a medical model that proposes the customization of healthcare, with medical decisions, practices, or products being tailored to the individual patient.

**Precision Medicine** is the intersection between:

- ✓ Individuals & Populations
- ✓ Markers of health and illness
- ✓ Environment
- ✓ Behavioral Health

## Question #2

What does participation in the AOU research program mean to a **CHC patient**?

- a. Long term engagement in the 10 year longitudinal study
- b. Opportunities to participate in additional research
- c. \$25 gift card
- d. Access to all information about themselves that they provide to the program
- e. Access to advances in disease prevention and medical breakthroughs

## Question #3

What does participation in the All of Us Research Program mean to a CHC provider?

- a. A patient's long term engagement in the 10 year longitudinal study
- b. Opportunities to participate in additional research
- c. \$25 gift card
- d. Their patients having access to all information about themselves that they provide to the program
- e. Access to advances in disease prevention and medical breakthroughs

## Question #4

What does participation in the All of Us Research Program mean to a **researcher**?

- a. A patient's long term engagement in the 10 year longitudinal study
- b. Opportunities to engage participants in additional research
- c. \$25 gift card
- d. Patients having access to all information about themselves that they provide to the program
- e. Access to advances in disease prevention and medical breakthroughs

Will precision medicine make our  
patients healthier?

How will we as FQHCs support our PCPs in communicating to our patients about the return of genomic results?

How can we as a Best Practices forum be a model for other FQHCs who might not be ready for research of this nature?

# What about technology challenges for our patients?

# How will our patients afford the future costs of medications and services afforded by precision medicine?
